! When using electrical equipment, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before installing and save for future use.
- Make sure all connections are in accordance with the National Electrical Code and local regulations.
- To avoid possible electric shock, be sure the power supply is turned off before servicing or installing the fixture.
- Service should be performed by qualified personnel.

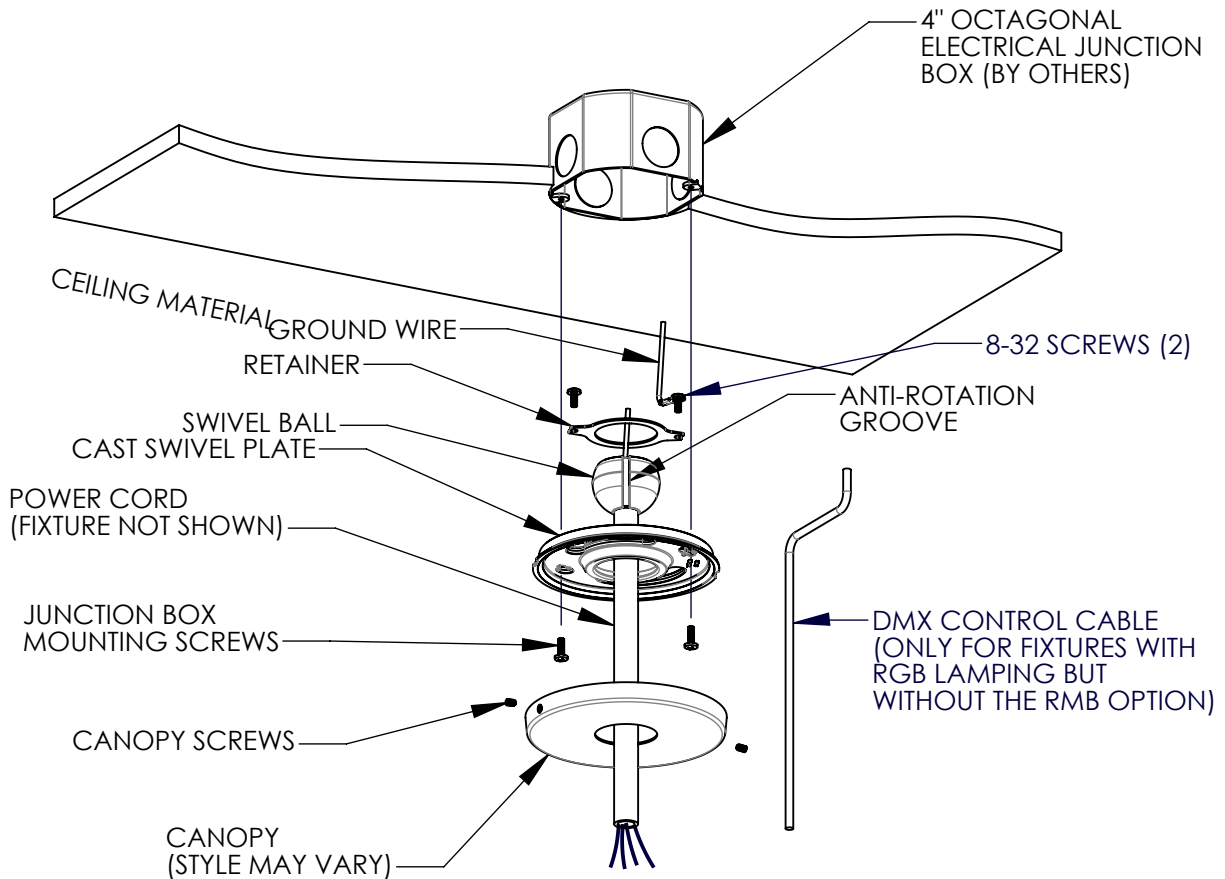

• These instructions may not cover all details or variations. If additional information is needed, please contact Visa Lighting.

Standard shipment with with cord and canopy attached to fixture.

Instructions -

- 1) Depending on the length of screws supplied with the junction box (by others), you may need to use the longer screws provided.
- 2) Fasten Cast Swivel Plate to junction box with 8-32 screws.
- 3) Make all wire connections per local and national codes.
- 4) Lift canopy in place and secure with screws provided.
- 5) If your installation requires the DMX control cable, it must be routed outside the junction box due to the low voltage class of the cable.

When using electrical equipment, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before installing and save for future use.
- Make sure all connections are in accordance with the National Electrical Code and local regulations.
- To avoid possible electric shock, be sure the power supply is turned off before servicing or installing the fixture.
- Service should be performed by qualified personnel.
- These instructions may not cover all details or variations. If additional information is needed, please contact Visa Lighting.
