 When using electrical equipment, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before installing and save for future use.
- Make sure all connections are in accordance with the National Electrical Code and local regulations.
- To avoid possible electric shock, be sure the power supply is turned off before servicing or installing the fixture.
- Service should be performed by qualified personnel.
- These instructions may not cover all details or variations. If additional information is needed, please contact Visa Lighting.

FIXTURE ORIENTATION

****FIXTURES MUST BE INSTALLED IN THE PROPER ORIENTATION****

1. Each fixture will have an "INSIDE" sticker on each housing unit.
2. These sides of the housings must face each other when installed.
3. Electrical connections can be made at either end of the housings, and knockouts have been provided to allow separation of wires for each circuit, if desired.
4. Each housing has a slot that the lamplate rests in and is fastened by screws in a slot on the other side. These features can help confirm proper orientation of the housings.

When using electrical equipment, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before installing and save for future use.
- Make sure all connections are in accordance with the National Electrical Code and local regulations.
- To avoid possible electric shock, be sure the power supply is turned off before servicing or installing the fixture.
- Service should be performed by qualified personnel.
- These instructions may not cover all details or variations. If additional information is needed, please contact Visa Lighting.

LAMPING REMOVAL/INSTALLATION

1. Before installing the housing, remove diffuser.
2. Remove lamplate screws
3. Each housing has a slot that the lamping rests in and is fastened by the screw slot on the other side.
4. Remove lamping screws and tilt lamping out of the lamping slot by grasping lamping "handles".
5. Rotate lamping to allow it to pass internal housing features.
6. Reverse the process to reinstall lamping after housing installation and electrical connections.

T-GRID INSTALLATION

Drawing: 762295XX

Rev: A

Sheet: 4 of 7

Eng: CLD

Date Drawn: 6/7/18

1. Inside grid members based on standard 24 inch spacing. Outer grid members spacing dependant on grid type.
2. After grid install, use provided grid brackets to secure fixture to grid members.
3. Carefully bend tabs on brackets in until contact with grid member.
4. Attach support wiring to the building and fixture.

When using electrical equipment, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before installing and save for future use.
- Make sure all connections are in accordance with the National Electrical Code and local regulations.
- To avoid possible electric shock, be sure the power supply is turned off before servicing or installing the fixture
- Service should be performed by qualified personnel.
- These instructions may not cover all details or variations. If additional information is needed, please contact Visa Lighting.
